Professional Summary

Full Stack Developer with strong expertise in **Next.js, React.js, Node.js, JavaScript, and TypeScript**, specialized in building modern, scalable, and secure web applications.

Experienced in leading web development projects from technical planning to final implementation and product optimization. Particularly interested in **clean architecture, application performance, and designing efficient user experiences**.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, Java, Go, C#

Frontend: React.js, Next.js (App Router), TailwindCSS, Material UI, Redux Toolkit, HTML5, CSS3

Backend: Node.js, Express.js, Spring boot, FastAPI, REST APIs, WebSockets, JWT Authentication, OAuth2

Databases: PostgreSQL, MySQL, MongoDB, BoltDB

DevOps & Tools: Git, CI/CD, Vercel, AWS, Docker (basic), Cron Jobs, API Integration, Webhooks

Software Practices: Clean Architecture, RESTful Design, Authentication & Authorization, UI/UX Design, Performance Optimization

Work Experience

Truckers Talent INC — Product Manager / Tech Lead / Full Stack Developer

Nov 2025 – Present

www.truckerstalent.com

- Led the development and evolution of the core product, aligning technical and business requirements
- Defined product roadmap, prioritized features, and coordinated with stakeholders
- Designed and supervised system architecture and conducted code reviews
- Developed key features using **Next.js, Node.js, Express, and PostgreSQL**
- Improved authentication, authorization, and session management for enhanced security
- Implemented **CI/CD pipelines** and deployment workflows
- Coordinated communication between technical and non-technical teams

Zatek Academy — Full Stack Developer

Sep 2025 – Jan 2026

- Developed an educational platform with **Next.js and FastAPI**
- Built REST APIs for user, course, and progress management

- Implemented **JWT and OAuth2 authentication**
- Integrated AWS for file and media storage
- Designed gamification system with levels and achievements
- Implemented automatic PDF certificate generation
- Designed relational database using PostgreSQL

Projects / Freelance

Fullstack E-commerce – Automotive Parts Platform

www.dovrepuestos.com.ar

Development of a fullstack platform using Next.js, Node.js, and PostgreSQL (Supabase), integrating Mercado Pago and an order system with payment validation. Implementation of REST APIs, admin panel, and automated stock control to prevent duplicate sales. Responsive UI built with TailwindCSS and dynamic updates without page reload. Scalable solution based on real-world e-commerce workflows.

Freelance Full Stack Developer — Real Estate Web Platform

www.marisapuentespropiedades.com.ar

- Designed and developed a full-stack real estate platform for property management and listing
- Built a modern and responsive frontend using Next.js, React.js, and TailwindCSS
- Developed scalable backend with Node.js and REST APIs for property and inquiry management
- Designed and implemented relational database using PostgreSQL
- Integrated Cloudinary for dynamic image and video uploads and management
- Developed contact forms with data persistence and lead management
- Implemented features such as dynamic image ordering, main image selection, and multimedia display
- Optimized application for SEO and performance
- Deployed in production using Vercel with custom domain configuration
- Focused on user experience and conversion optimization (CTAs, WhatsApp integration, forms)

Full Stack Ecommerce Platform

Feb-2026

iphones-e-commerce.vercel.app

- Built a scalable **full-stack ecommerce platform** using Next.js and Node.js
- Designed a **PostgreSQL database (Supabase)** with optimized queries and stock control
- Implemented **JWT authentication and protected routes**
- Developed shopping cart and order management system
- Integrated **Mercado Pago API with webhooks** for automated payment confirmation
- Built admin dashboard for product, order, and payment management
- Implemented **cron jobs** for automatic stock release
- Developed user dashboard with order tracking and history
- Automated transactional emails using Nodemailer
- Deployed on Vercel ensuring performance and availability

Pastelería Selenita — Full Stack Developer (Freelance / Maintenance)

Feb 2024 – Present

pasteleria-sele.vercel.app

- Maintained and improved a production **ecommerce SPA** built with React and Node.js
- Developed admin panel with protected routes and role-based access
- Integrated **MercadoPago API** for online payments
- Automated email notifications using EmailJS
- Optimized backend APIs and SQL queries for performance
- Managed relational database design and normalization in MySQL

Real-Time Secure Messaging Platform

Feb 2025 – May 2025

- Developed a real-time chat application using **React and Socket.IO**
- Built backend with **Node.js and Express** using layered architecture
- Implemented **JWT-based authentication and authorization**
- Applied end-to-end encryption for secure communication
- Optimized PostgreSQL queries for message storage

Perfume Ecommerce Platform

Jun 2025 – Sep 2025

perfumes-arabes.vercel.app

- Developed a responsive ecommerce platform using **Next.js and TailwindCSS**
- Built RESTful APIs with **Node.js and Express**
- Implemented custom middlewares for validation and access control
- Designed and normalized relational database in MySQL

Education

- Universidad General Sarmiento

Associate Degree and Bachelor's Degree in Systems (4th year – in progress)

Academic Skills:

Java, Spring boot, Python, Go, C#, PostgreSQL, BoltDB, Scrum, Technical Documentation, Automated Testing, UI/UX Design

- Advanced Full Stack Web Development Course – UTN (2021)

Duration: 8 months

Full-stack web development training focused on frontend technologies (HTML5, CSS, Handlebars, React.js, JavaScript) and backend development (Node.js, Express.js), including relational and NoSQL database design (MySQL, MongoDB).
